CANAL POINT, PALM BEACH COUNTY, FLORIDA FRIDAY, APRIL 19, 1929.

TOMATOES MOVE TO NORTHERN MARKETS FROM GLADES FARMS

Light Yields And Steady Demand Makes Prices For Fruit

WEEK BEAN SHIPMENT INCREASED 10 CARS

Everglades Sections Produced Bulk of County Tomato Crop Last Year

Movement of tomatoes from the upper Everglades, famous for its "Yak" tomatoes, increased in volume this week when shipmen brought to cars forwarded this season 10 to 15 cars. Dry weather has retarded growth and maturity of fruit but quality has been good and firm and well filled tomatoes being the rule.

Shipments for the season have been from the Canal Point-Pahokee section, small shipments from Belle Glade-Chosen going by express.

Movement of the coming season's tomatoes from the upper 12 miles more than doubles that of a comparative period last year when very little was shipped. In April 18, 1928, estimated volume of this season's movement, however, is less than last year.

Of the 718 cars of tomatoes shipped from Palm Beach county last season, 465 cars moved from the Everglades, the canal section furnishing 33 cars of the total.

From a survey of fields, this section and from figures quoted by large number of farmers, commission merchants, and railway officials, the estimated movement of tomatoes from the east and south sections of Lake Okechobee is about 500 cars for the season. It is believed that fields in the Canal Point-Pahokee section will produce about 100 cars.

At the Belle Glade-Chosen section, the car has been moved from the car lot to the market. Prices for fancy fruit in northern markets have been good and demand has been steady. F. O. B. prices at the Canal Point station were \$3.50 to \$4.50 Thursday for good quality with light supply.

Bean Shipments.
A slight increase in movement of beans is noted this week. Total shipments from the east and south sections from April 10 to 16 this week, being 138 cars as compared with 128 cars from April 3 to 9 inclusive.

Prices for beans are a little lower than a plentiful supply of beans at \$2.15 a bushel.

Tabulated report of shipments of beans and tomatoes from the two-week period is given below:

	Tomatoes	Beans
10	19	19
11	22	22
12	28	28
13	24	24
14	23	23
15	15	15
16	20	20
Total	138	138

Six cars of potatoes were forwarded from the Belle Glade-Chosen station in the past week. Most of them coming from the Brown Canal plantation on Hillsboro canal. One car of mixed vegetables and one car of carrots forwarded from the Canal Point station last week. Two cars of mixed vegetables went out this week.

Shipment of vegetables this year to April 18 from Florida, East Coast railroad stations in the Everglades totals 1,060 cars, which is 125 cars less than the whole season's movement last year.

With the strong west wind Monday and Tuesday, a local rain storm was blowing away dipping and clearing in the breeze. It is thought that the weather is clearing. "Chickadees" and other insects.

Statistician Sees Glades Tomato Crop

Mr. A. Marks, agricultural statistician for division of crops and stock estimates, U. S. Department of Agriculture, visited Wednesday and Thursday in the upper Everglades, checking estimates of probable tomato yields and figuring the amount of beans yet to be shipped.

Mr. Marks viewed the Canal Point-Pahokee section with J. R. Poland, at whose home he was a guest while here.

The statistician reported that Manatee county had started shipping tomatoes in car lots about 25 cars moving last week and more than 100 cars this week. Heavy shipments are scheduled for next week. Movement of tomatoes outside the east coast has about ceased and the Vero Beach section is now shipping.

Mr. Marks said that tomatoes as far north as Ocala would be moving by May 1.

At the meeting of the Florida State Horticultural Society at Clearwater last week, Sebring was selected to preside at the annual convention in April next year.

Miami had a bid in for next year's convention which will be held in Sebring. Vero Beach also was a candidate for the convention but did not have enough support to win.

TO PROVIDE FOR 25 YEARS

Program For Canal Point Improvement To Start Right Away

Substantiating the announcement from Clewiston last week that a program of improvement for Canal Point township would be initiated by the U. S. Department of Agriculture, the Southern Sugar Company and general manager of the Canal Point division, Wednesday stated that work would begin as soon as contracts can be awarded.

The first work to be done will be the erection of a large guest house on the ridge for the convenience of the U. S. Department of Agriculture. Mr. Ryan, the building will consist of four bedrooms, a large sleeping porch and other rooms necessary for comfortable living quarters.

Thirteen residences for white families and three California type bungalows, accommodating several families each, will provide for 25 families.

The price for the work is expected to be about \$250,000. The U. S. can testing station, street will be constructed, surfaced and sidewalks laid.

It is planned to beautify the lake in which the domestic water supply plant is located. The lake will be landscaped and shrubbery and landscaping it for a park.

The improvement of the Canal Point township will be carried out under the supervision of the Clewiston division. It has been announced by Captain E. Deane, chief engineer, that under this arrangement development and beautification of the township will come under the personal supervision of Captain Duff who directed the beautification work in Clewiston, built Hialeah, Clewiston's negro section and for the past year as general manager has been active head of all development work in that area.

In connection with street work, Captain Duff announced that in Clewiston experiments are being conducted with various kinds of oil to be used on the streets with a view to getting a permanent preservative for the hard surface on the main streets and to eliminate dust.

On Clewiston a local mail truck will be here in time to develop the local mail route. This truck because of its abundance of this material in the Clewiston section.

PELICAN LAKE BOTTOM SOLD TO PAHOKEE MEN

At a price of \$25 an acre and lake bottom land for \$30. It is understood that the lower price for the land was allowed on account of its susceptibility to flooding in wet weather.

Pelican Lake bottom was farmed last year but most of the land was too wet for a crop this spring. Plans have been made by the sugar company to increase their purchase in their lake system it is reported. Development plans of 11 - 90 - 63 are now being completed. It is understood that the area will be improved for winter trucking next year. The land in Pelican Lake bottom is considered unsurpassed for tomato production in dry season.

Lake-Coast Road Is Repaired In Martin

Phil Y. Cason, county commissioner from the Indian River district in Martin county, visited in Canal Point, Wednesday. Reported that county forces had completed repair of the section of road between Gaird Highway and Indian River. Port Mayaca on Lake Okechobee giving a through road from the lake to the coast at Stuart.

The road on the bank of St. Lucie canal has given much trouble during periods of heavy rainfall due to ravines and washes on its route and Commissioner Cason says that the route of the road has been slightly changed to go around the washes. Bridges are completed and the road is well repaired to keep the surface in excellent condition.

Program For 1930 In Canal Point Section Hampered By Toll Costs

SAYS TOLLS CONTRARY TO AMERICAN SPIRIT

Gas Tax Should Pay For Roads In This Territory As In Other Sections

R. G. Dahlberg, president of the Southern Sugar Company and allied industries, who is developing large sugar plantations and mills in the Everglades, protests the payment of tolls by residents of the section and in a letter to The Everglades News tells of the effect of the toll road on the industry of which he is the head.

In going over our plans for the 1930 expansion, the program which should be completed early in the year at Canal Point, work of which should be started this fall, and grinding to a halt.

We eventually will have three or four of these units around the lake. It is a very serious matter for the operating officers which the Canal Point location would be under very heavy handicap by reason of the fact that there is no highway transportation in and out of Canal Point except the canals, which is a very slow method of transportation.

It seems to me that it is wrong economically, politically and communally to have in America any toll roads so that this is a serious matter for the operating officers which the Canal Point location would be under very heavy handicap by reason of the fact that there is no highway transportation in and out of Canal Point except the canals, which is a very slow method of transportation.

I hold no brief either for or against Mr. Comer's plan to build the road and has his money in it. It should, of course, receive commensurate consideration for a private toll road in Florida, in the United States.

It seems to me that this is a serious matter for the operating officers which the Canal Point location would be under very heavy handicap by reason of the fact that there is no highway transportation in and out of Canal Point except the canals, which is a very slow method of transportation.

If that section of Florida is to be properly developed, it must have a system of communication, and one of the most important of these is a system of communication, and one of the most important of these is a system of communication.

John A. Wilde, secretary and treasurer of the association, acted as master of ceremonies and made the opening address. He introduced the following speakers in their respective order: J. R. York of Pahokee, Felix H. Whidden, general manager of the Southern Sugar Company, former county agent, "Jack" Zim, West Palm Beach, Stafford R. Vorenberg, executive secretary of the Greater Palm Beach Chamber of Commerce, H. M. Mounts, county agent, Homer S. West of Palm Beach, ex-senator T. J. Campbell of West Palm Beach, C. B. Savage, assistant chairman of the board, and E. F. Fritchling, West Palm Beach, former director of Coleman & Co., Inc., in charge of construction of the building.

Co-operative selling of produce was the main subject introduced and details of co-operative practices were given.

Many old-timers from the east coast who have been interested in this section for many years were seen among the audience.

After the speakers and refreshments the Brown Plantation orchestra furnished music for dancing until a late hour.

Build In A Week.
Work on the packing house was started last Wednesday and the 100-foot building is now ready for operation. Construction of the building is substantial, floor slabs being set, strapping and walls storm sheeted. The roof is corrugated iron. Cost of the building is given above \$3,000.

The packing house will have a capacity of five carloads of tomatoes daily, and plans are being made to make it one of the finest houses of its kind to operate in the Everglades.

Of the 100 carloads of produce are expected to be shipped by the Canal Point packing house this season. The bulk of the produce is large size of tomatoes, but a large share will be composed of "peppers" and "peppers".

The bulk of the tomatoes received by the association will be turned over to the Ape Brothers' canning factory, where the growers will receive cash for their produce at West Palm Beach.

Fort Pierce will celebrate post opening early in June.

TOLL ROAD HANDICAP TO EXPANSION PLANS

DAHLBERG STATES

State Road Department Lets Work On Road 25

Additional Projects Are Let To Complete Cross-State Highway To LaBelle

W. C. HUFFMAN COMPANY AWARDED TWO PROJECTS

Work In Hendry County To Cost State Road Department \$126,551.22

Continued improvement of cross-state road No. 25 west of Palm Beach and Fort Myers, was provided for Thursday last week when the state road department let the closing session of its quarterly meeting awarded contracts for the construction of road bridge projects on the highway in Hendry county. The new projects will connect with the road work that is now being finished between Belle Glade in Palm Beach county and the Hendry county line and will continue to LaBelle, state road No. 25.

Work on state road No. 25 was let in three projects. R. C. Huffman Company being awarded two at \$29,630 and \$57,228.10, respectively and R. B. Stewart, Fort Myers, one at \$29,630. The two projects awarded the Huffman company are at each end of the complete construction project which the other contractor will work in between.

The South Bay headquarters of the Huffman company had been notified of the contract awards and it was not learned when the new work would start. It is expected, however, that adequate equipment was on hand to prosecute the work.

The Huffman company is now working on the portion of state road No. 25 between Belle Glade and the Hendry county line and has completed the road as far west as Miami Lake. The surfacing contracting company is applying oil treatment to the surface and slag is being dumped along the road for the top layer. Twelve concrete cars of rock were on a siding at Belle Glade when the Huffman company was notified of the contract awards.

In the 17-mile stretch between Belle Glade and the Hendry county line, there remains less than three miles of grade which has not been leveled to a fair grade and it is the Huffman company's construction forces to complete the whole project within 30 days.

The R. C. Huffman Company is now working on the portion of state road No. 25 between Belle Glade and the Hendry county line and has completed the road as far west as Miami Lake. CANAL POINT

Miss Catherine Buchanan spent Tuesday in West Palm Beach.

Miss Eunice Swire is spending the week-end with friends in Fort Lauderdale.

Mrs. W. A. Adams attended the annual Methodist conference at Lake Worth Tuesday.

Corbett McAlum, who worked several weeks in the barbers shop at Canal Point, returned to his home at Alamo, Ga., Sunday.

Mrs. W. P. Jennings, sr., of Monticello, is visiting her son, W. P. Jennings, jr., and wife here. She expects to return home this week-end.

J. H. Wyse of Longwood, Fla., first principal of the Canal Point school in 1923, called in Canal Point last week and subscribed to The Everglades News. Mr. Wyse retains land in this territory purchased several years ago.

Miss Minnie Lowe, who is staying at Sanford, visited her parents, Mr. and Mrs. D. O. Lowe last week and was given a party Thursday evening before her return up state.

Those present were Comer Thompson, James Lee, Abner Harrison, Samuel Crane, James Miller, Buck Buchanan, Foye Morris, Earl Frank and Arnold Lowe, Misses Vernon and Elizabeth Stuckey, Mrs. Mansfield, Sarah Cox, Eva Lowe, Virginia Sims, Margaret and Elizabeth Lowe, Mrs. J. R. Ellis of Sanford and Mrs. Mary J. Graham of Lakeland.

Fred Higginson, who has been operating a flag City excavating machine for the Southern Sugar Company, left through the mail a check for \$1000 and took the train for a pump house and tore the muscles of his arm so badly that he has been unable to work.

Miss Edith Hughes spent the week-end with her parents in Bartow. Her mother returned with her and returned to Bartow the following day.

C. P. HIGH SCHOOL News

The president of the Athletic Association and sepiar class, Thurmond Knight, has agreed to allow us to put a short sketch of his life in this issue of The Everglades News as the first of a series of biographies of this year's senior class.

Thurmond W. Knight was born in Glenville, Ga., July 26, 1908. He lived there for seven years, then moved to West Palm Beach where he lived for five years. In 1921 he moved to Canal Point and stayed there until 1925 when he went to Jacksonville to take a business course. He stayed in Jacksonville for two years and then returned to Canal Point. In 1928 he went into business with W. S. Brantley, later buying him out. He now owns half share in "The Lake Shore Supply

His ambition is to become a lawyer and wish him good luck. School, don't tell anyone, but his nickname is Finn.

The seniors' games last week. They all fit well—at least Fred says his. It is a thirteen and a half and he has offered it to some of the girls for a bracelet. However, everybody—Fred, too—is proudly wearing his ring.

The May queen was chosen last Friday. After the coronation were counted it was found that Elizabeth Lowe had won. Everybody thought she would. Pretty May queen.

The complete program will be in next week's paper, and will be given in the afternoon of Wednesday, May 1, at about 4:00 o'clock. Everybody plan to come.

The picture which the ninth and tenth grade had framed at Halsey-Griffiths have come and now they are hanging in our home room.

The seventh and eighth grades have one new picture. It is "The Lone Wolf".

The second California tourists has returned. He reports having reached Swanton, Ga.

Some of the favorite expressions of the "Frobbles" are:

Vernon Stuckey—"You would do something like that."

Baker—"You'd be surprised."

Oreglia Thompson—"Oh, my conscience."

Elizabeth Stuckey—"And How?"

Iva Johns—"Hot Stuff!"

Margaret Lowe—"You dumb thing."

Francis Carter—"Get outa there!"

Lucille Thillocaux—"Oh, ta-male, whoopee?"

Lois Spencer—"Oh, my heart!"

Ottis Vinson—"That's my weakness!"

John E. Carter—"Aw, that's not me!"

Contest On History of Canal Point

The seventh grade is having a contest on the "History of Canal Point, or Nemaha." It is being sponsored by Miss Young, their geography teacher.

Miss Young will give a prize for the best report.

Emily Carter has written to Mr. Simon of West Palm Beach and has received some valuable information from him on the early history of our town.

Others have gotten information from people in town.

The winning report will be published in The Everglades News next week.

The Junior Play.

The juniors are going to put on a one-act play at the Pahokee theater to make money for the junior-senior badge. It will be three weeks before they will be able to put it on, for the rehearsal is now in progress and they will probably wait until after the May Day program.

Last Seed Cane From Clewiston Wednesday

The last large load of seed cane from Clewiston fields was brought to the Canal Point Southern Sugar Company plantation Wednesday by the company's tug. This does not mark the cessation of planting on this side of the lake, however, as there is seed available here for several hundred acres planting.

The company is now planting cane on close-in land between the sugar mill and Canal Point. This does not plant with relative freedom from frost, will insure a supply of seed for next year.

With an acreage of three or four hundred acres yet to be planted, so can the company is steadily performing its planting program which will total about 4,000 acres this season.

Newell Questions Seed Law Benefit

Continued from Page One

Printed below is a letter from Dean Newell which is self-explanatory:

Dean Newell's Letter, Gainesville, Fla., April 2, 1929. Hon. Howard Sharp, House of Representatives, Tallahassee, Florida.

Dear Mr. Sharp: There has been sent to us by Mr. Curtis Nye Smith a printed order for a so-called "Uniform State Seed Law." We are also in receipt from Mr. U. M. Monte county agent West Palm Beach copy of your letter of March 26 to him in which you ask that my opinion be given you with reference to the merits of the bill or proposed uniform seed law.

I take it that you have in mind the question of whether or not the seed law in question would be a desirable one or an appropriate one for the State of Florida.

The proposed law, which we have received direct from Mr. Curtis Nye Smith, is a law intended to prevent the distribution in crop seeds of seeds of noxious weeds and plants and it is quite evident from an examination of the law that it was designed primarily for conditions existing in the northern and western portions of the country where the growing of grain and cereal crops constitutes a large part and even the most important part of farm production.

The problem of weeds in field crops in Florida does not appear to be by any means as serious a problem as it is in many northern states. So far as I know, we have no problem here in Florida which is comparable, for example, to the occurrence of Russian thistles or other weeds in the grain fields of the north or Johnson grass in the cotton fields of Texas.

Many of the plants which in Florida we are accustomed to refer to as weeds are, in reality, plants which themselves are sometimes grown as crops or which have an agricultural value. You are well aware of the fact, for example, that St. Lucie and Bermuda grass, when occurring in fields devoted to cultivated crops, can well be considered as weeds and are so considered by the farmer, yet both these crops, under certain other circumstances, are very valuable for pasture and for hay.

The weed problem in Florida is, in our judgment, sufficiently serious to warrant the creation of new offices and the payment by the tax payers of salaries of inspectors and analysts to enforce a seed law.

As we see it, the greatest need in Florida, from the standpoint of seed legislation, is an act protecting farmers from seed contaminated by disease, or a law requiring the certification of seed as to its relative

freedom from certain diseases, especially in connection with certain vegetable seeds.

It is doubtful if such a bill could at the present time be satisfactorily drawn, owing to the fact that sources of certified seed for many of our common crops are not available.

It is also to be remembered that the cost of certifying seed law might either be paid by the tax payers out of general revenues or by taxes imposed upon the seeds themselves. I feel sure that no addition to our present tax burden is desirable at this time, unless it be to meet some real and pressing need.

I think you will also agree that we do not wish to raise the cost to farmers and truckers of seeds which they purchase, unless they are to secure in connection therewith, some manifest advantage. The fact that the farmer will in the end have to pay for the cost of enforcing any seed law should be weighed very carefully against any anticipated benefits from such a law.

It is conceivable also that a seed law may, under certain circumstances, work a great hardship upon the farmer. Let us suppose, for example, that the bean crop in the Everglades should be repeatedly destroyed by frost or floods or both and that no seed remained available except that none at all, yet he could not do so because of the provisions of the law.

It is our judgment that a so-called "pure seed law" for Florida is likely to entail for the farmer more disadvantages than advantages, under the conditions existing at the present time.

Very truly yours,
WILMON NEWELL, Director.

ANNOUNCEMENT

Doctor Goodman, Chiropractor, will be at Pahokee each week day after 2 p. m. until further notice, beginning April 22. Those desiring drugless treatment can locate the doctor by calling at The Pahokee until he is located—Advertisement.

HE SHOULD HAVE USED SWP

House Owner: I had this paint put on last year and look at it now. Painter: It doesn't take long for the weather to show up poor paint. House Owner: But how was I to know it was poor paint? I'm no paint expert.

Painter: It doesn't take a paint expert to get reliable paint these days—just ordinary intelligence. For instance you ought to know that there is a Company of paint experts that have been making Williams Company and the paint is known to no painters as SWP. Wouldn't you be safe in trusting such a paint?

The painter is right, as we can prove by scores of house owners in this town. If you want your house to stay painted get SWP from us.

BRANCH: CANAL POINT

Home of the Bred Right Seed

"Pass the Molasses, Roscoe"

Back in the roaring forties and fifties fine, white sugar was not quite so scarce as molasses pictures, but it was scarce—and expensive. Especially was this true of the thousands of small, pioneer communities that made our country at that time. Sweetening, even of tea and coffee, was done mainly with molasses and crude syrups, or brown sugar.

A far cry it is from the old molasses jug to the clean, pure white sugar that everybody has in abundance these days. The modern product is the result of much scientific research and technical skill applied to sugar refining processes.

Until very recently, however, little study has been given the raising of sugar cane. Only when plant diseases had seriously harmed crops and cut down production did the growers begin to make adequate laboratory

experiments and bring new methods to the rescue of the industry. The results obtained by introducing certain new canes, notably the "P.O. J." varieties, developed in Java, have shown what scientific study and aggressive action can do in this branch of agriculture.

The undersigned companies believe that the vital importance of sugar to our national security and well-being calls for the development of American sugar production to the fullest possible extent. The favorable situation of these companies from the growing and marketing standpoint, should enable them to expand rapidly and to contribute substantially to the upbuilding of the industry. A booklet describing their activities and giving some idea of the way in which modern science has entered the field of sugar will be sent upon request.

Grasp Your Opportunity NOW--TODAY
\$2,000 IN PRIZES FREE

Here is your opportunity to become the owner of a beautiful automobile without investing a nickel.

The Everglades News is going to give away a Ford Tudor Sedan and five other valuable prizes to the young ladies of Palm Beach county and adjoining who prove to be the best hustlers in securing subscriptions. In other words, The News is inaugurating an automobile contest and to the winners will award some expensive prizes.

Everybody in the Everglades should read The News. This paper is now being read by several hundred people in this section. The subscription list is steadily increasing. But The News want to grow faster. It is the desire of The News to increase the paid circulation to the highest possible point before the beginning of the summer months. To do so the services of the young ladies of the county are going to be enlisted and to those deserving of them valuable prizes will be distributed.

ANY AMBITIOUS YOUNG LADY CAN WIN

The contest is thrown open to any young lady who lives in Florida. She must be over twelve years of age. Everyone has an equal chance to win. The one who proves most capable will ride home in the Ford Tudor Sedan, while still others will win worthwhile prizes.

Everyone knows what a wonderful car the new Ford is. To be the owner will be a pride to you and the envy of all your friends. And you can win. Will you? All that it takes is a little effort on your part, securing subscriptions to The Everglades News.

EASY TO SECURE SUBSCRIBERS

It is a simple matter to secure subscriptions for the Everglades newspaper. Publishing all the local news and happenings from this section, The Everglades News is in great demand. The Everglades News is in great demand in every household. You will find it an easy matter to get readers not only here in Palm Beach county and close in sections, but in neighboring towns and counties.

HOW TO WIN

If you wish to win one of these fine prizes you must get busy at once. Don't allow one day to pass without entering your name as a contestant, rolling up your sleeves and going to work.

It will be the young lady who gets an early start who will stand the best chance of coming out winner of the most expensive prize. The one who waits until the campaign is nearly over will be at a disadvantage. The young lady who starts now will have a distinct advantage over the others who start later.

List Of Prizes

FIRST GRAND PRIZE

A Ford Tudor-Sedan, wire wheels, value \$641.00, purchased from and on display at Elliott-Robison, Inc., Pal-hokee, Fla.

SECOND GRAND PRIZE

\$200.00 in Gold

THIRD GRAND PRIZE

Five-piece Bed Room Suite, value, \$150.00, purchased from and on display at Palm Beach-Mather Furniture Company.

FOURTH GRAND PRIZE

A Crosley Radio, purchased from and on display at B. Elliott's.

FIFTH GRAND PRIZE

Diamond Ring, Value \$60.00, purchased from and on display at Sarau, Jeweler, West Palm Beach.

SIXTH GRAND PRIZE

Wrist Watch, Value \$60.00, purchased from and on display at Watts and Son, Jewelers, West Palm Beach.

An Early Start Makes Winning
Easy--Send in Your Own Name or
That of a Friend Today to the
Campaign Manager, The Everglades
News.

Get Half Million Votes

In order to make it easy for you to get started and so you can quickly pile up 500,000 votes towards YOUR car, the "EARLY STARTER'S OPPORTUNITY OFFER" is made today. Each of the "Opportunity Coupons" above when clipped out, filled in with your name and address and sent in to the Campaign manager, together with two yearly subscription (either new or renewal) will count for 100,000 EXTRA VOTES, in addition to the regular votes allowed on the subscriptions and in addition to the 25,000 extra votes allowed on the First-Subscription Coupon. Each member is limited to only FOUR of these Opportunity Coupons—get eight yearly subscription (two six months subscriptions will count same as one for a year on the Opportunity Coupon offer) and you will have secured your Opportunity Coupons and will have 400,000 EXTRA votes allowed you. Remember these are EXTRA votes and are in addition to the regular votes. This is YOUR chance—grasp it quickly—as the Opportunity Coupons are limited in time and will be void after April 27th. If you are not already enrolled as a Campaign member, see to it that your Entry Blank is sent in today. Then get busy and with the FOUR OPPORTUNITY COUPONS you can quickly roll up a HALF MILLION VOTES towards the prize you want.

OKEELANTA

April 15, 1929.

Last Sunday a week ago the Crovells had for their dinner guests the family of D. Taylor. The children were very much interested in the green parrot.

The North Palm Beach which during the week picked peas on the Masse place, is now busy picking and shipping beans from the Franz ranch, their own crop.

Week before last Vernie Tilton and mother from Landlake, paid their pioneer friends in Okeelanta a shod visit: the pleasure of meeting was increased by the two other occupants of their car, May and Frances Nickerson, who with their parents spent a number of years here in the earlier days. The effects of the drought brought the two girls from their Canada home to Florida for winter weather in the north to our balmy spring temperature in Florida, showed in the acquired tan of health of our girl friends.

The farewell dinner at E. J. Coopers last Sunday to George Graham was greatly enjoyed by the honor guest and Mr. and Mrs. Frank Tully, have held their own at W. W. Roth. George departed for Lincoln, Arkansas, on Monday to meet the summer with his sister.

This community has keenly felt even this temporary absence of one who has shown himself a very interested in the welfare of his fellow pioneers. Good luck and an early return, George.

Peter Kintson has somewhat improved the appearance of the town by the removal of a forest of pine trees in front of his residence and the plowing up of a tract of land north of the foot hills, which he is planning to erect.

The former Bollinger home is being repaired by Ed Cooper and will soon be ready to be occupied.

The road between the two towns—South Bay and Okeelanta—is terrible in such shape. An unusual amount of dirt and gravel has already been expended on it, the result of it is actually killing the fish of the canal.

Potato digging was begun on the Masse place last Monday. The crop promises.
